Rotating Quotes

- "Reality, as you currently experience it, is something like a waking dream. It is disguising deeper and more intensified levels of being and knowing. For those who are ready and willing, the doors to those other levels now stand open." — Daniel Pinchbeck
- "Psychedelics are not a substitute for faith. They are a door to authentic faith, born of encountering directly the sacred dimension of everyday experience. This is not

the only gate to that discovery, but it is the most ancient and universal, and potentially the most accessible to the majority of the human race." — Rick Doblin

- "The psychedelic experience is a journey to new realms of consciousness. The scope and content of the experience is limitless, but its characteristic features are the transcendence of verbal concepts, of space-time dimensions, and of the ego or identity." — Timothy Leary
- "We are not going in circles, we are going upwards. The path is a spiral; we have already climbed many steps." — Hermann Hesse

FAQ

1. What is [Psanctuary.org](https://psanctuary.org)'s Mission?

- Psanctuary is a decentralized spiritual community advocating for religious freedom and the sacred use of entheogenic sacraments. We integrate ancient plant medicine wisdom with modern blockchain technology, creating a sovereign space for spiritual exploration, healing, and collective growth. Our mission is to preserve and protect the right to use sacred mushrooms as tools for consciousness expansion and divine connection.

2. What is a Blockchain and Why Does It Matter?

- A blockchain is a decentralized, immutable ledger that records transactions across a network of computers. For Psanctuary, this means your spiritual offerings, NFT collections, and governance votes are permanently recorded and cannot be censored or controlled by any central authority. It's the technological foundation for true digital sovereignty and religious freedom.

3. What is a Wallet and How Do I Use It?

- A crypto wallet (like MetaMask) is your digital identity on the blockchain. Your wallet address (e.g., 0x1234...5678) is like a bank account number - it's public and used to receive tokens. Your private key is like your password - never share it! Connect your wallet to interact with our dApp, sign transactions, and manage your digital assets.

4. What is Gas and Why Do I Need It?

- Gas is the fee paid to blockchain validators for processing your transactions. Think of it like postage for sending a letter. On our platform, Daily Mushroom tokens (ERC20) act as gas currency for cross-breeding, creating a self-sustaining ecosystem where your daily farming directly powers your genetic experiments.

5. What is PSD (Psanctuary Dollar)?

- PSD is a stablecoin pegged to USD, designed for stable trading within the Ethereum Offering ecosystem. It's an ERC20 token that maintains a 1:1 value with the US Dollar, providing a reliable medium of exchange for all platform transactions without the volatility of other cryptocurrencies.

6. What is ETHO (Ethereal Token)?

- ETHO is the primary governance and utility token of the Ethereum Offering platform. As an ERC20 token, it's used for voting on proposals, burning at the altar for Proof of Burn NFTs, and participating in the ecosystem's economic activities. Holding ETHO gives you a voice in our decentralized spiritual community.

7. What's the difference between ERC20 and ERC721 tokens?

- ERC20 tokens (like ETHO, PSD, Daily Mushrooms) are fungible - each token is identical and divisible, like dollars. ERC721 tokens (like Mushroom Farm NFTs, Proof of Burn NFTs, Hybrid Mushrooms) are non-fungible - each is unique and indivisible, like a one-of-a-kind artwork or certificate.

8. How does the Mushroom Farm work?

- Inoculate your substrate and mist regularly to maintain proper fruiting conditions. After colonization (8 hours), your first flush is ready! Harvest creates a unique ERC721 NFT of your complete farm with multiple psilocybin mushrooms. Additionally, collect a single Daily Mushroom (ERC20) every 24 hours - these act as gas currency for cross-breeding experiments.

9. What is Cross-Breeding?

- Cross-Breeding allows you to combine two parent mushrooms to create unique Hybrid Mushroom NFTs (ERC721). Each breeding attempt consumes Daily Mushroom tokens (ERC20) as gas, creating rare genetic combinations. It's like real mycology - experimenting with genetics to discover new strains and properties!

10. What happens when I burn tokens at the Altar?

- Like sublimation in alchemy, where matter transforms from solid to gas without passing through liquid, your ETHO tokens undergo a sacred transformation—transcending their material form to become eternal proof of your spiritual offering. This is the alchemical principle of releasing oneself from material attachment (magic) into spiritual light (divine consciousness). You receive a soulbound Proof of Burn NFT (ERC721) that eternally records your offering on the blockchain.

11. How does the AMM/Swap work?

- Our Automated Market Maker (AMM) allows you to swap between ERC20 tokens (ETHO, PSD, Daily Mushrooms) using liquidity pools. Provide liquidity to earn fees from trades. All swaps use the constant product formula ($x * y = k$) for fair, decentralized pricing without intermediaries.

12. What is a Faucet?

- A blockchain faucet is a tool that dispenses small amounts of cryptocurrency for free, usually for testing purposes. If you're new to crypto and need gas fees to get

started, faucets can provide you with a small amount of ETH or testnet tokens to begin your journey.

13. What is Staking and Liquidity?

- Staking means locking your tokens to support network operations and earn rewards. Liquidity provision means depositing token pairs into a pool so others can trade - you earn fees from each swap. Both are ways to put your tokens to work and earn passive income while supporting the ecosystem.

Understanding Your Mushroom Tokens

- ETHO (Ethereal Offering Token) - Utility: Primary utility token for offerings, access, and governance influence throughout the dApp.
- PSD (Psanctuary Dollar) - Stable Unit: Stable, donation-oriented unit for crowdsale/donations and denominating certain rituals.
- Daily Mushrooms (ERC20): Earned via participation. Used as a gas-like resource for actions such as cross-breeding.
- Mushroom NFTs (ERC721): Collectible strains, seasonal evolutions, and hybrids created through rituals like cross-breeding.

Roadmap

- Phase 1: Psanctuary Foundation (Status: Current)
 - Sacred token burning ritual - Ceremonial ETHO offerings
 - Mushroom NFT cultivation - Collectible genetic strains
 - DAO governance structure - Community-driven decisions
 - AMM for ETHO/PSD trading - Decentralized exchange
 - Crowdsale for initial funding - PSILO token distribution
- Phase 2: Psychedelics In Recovery (PIR) Integration (Status: Q2 2026)
 - Expand DAO to support 12-step recovery fellowship
 - Fund research on psychedelic-assisted recovery
 - Create social network for spiritual wholeness
 - Gamified governance for community engagement
 - Educational resources and peer support systems
- Phase 3: Circle of Light Fellowship (Status: In Collaboration)
 - Integrate Circle of Light Fellowship into Psanctuary ecosystem
 - Bridge outreach with PIR and OneSelf communities
 - Publish Fellowship FAQ and program guidance
 - Emphasize responsibility and God-centered healing
 - Expand support groups, education, and advocacy
- Phase 4: Policy Reform & Advocacy (Status: Q4 2026)

- State-level decriminalization voting mechanisms
 - Religious sacrament legal framework development
 - Psilocybin access for spiritual use advocacy
 - Educational outreach programs for public awareness
 - Partnership with reform organizations
-

Oracle of Fruit

- Role — Ritual intelligence and insight engine guiding members

- Functionality — Offerings processing; spiritual guidance; NFT/ritual suggestions; Gratitude system interfacing; meditative content
- Key Capabilities — Guidance; trackers; proposals; transparency; onboarding; journaling; community links
- Privacy & Consent — Opt-in, boundaries-respecting; not therapy or financial advice

Daily Shrooms

- Daily Mushroom (ERC20) — daily token; gas for cross-breeding; accumulation narrative
- Farm Harvest (ERC721) — first flush after 8 hours; NFT of complete farm
- Cards — Daily Rewards; Streak Bonuses; Special Events; Growth Mechanics

Farming Mechanics

- Dual token system; hourly and daily mushrooms; PSILO & ETHO context
- Hourly: collection mechanics and uses
- Daily: crafting and cross-breeding
- Boost mode; cooldown; store; PSILO; fertilize; tiers; revenue; gamification; vision; incentives
- Sustainable loop and key benefits

Altar Burn

- Ceremonial Burning; Impact & Purpose; Deflationary Mechanics; Burn Rewards
- Burn Tiers & Rewards: Spark (100 → Bronze), Flame (500 → Silver), Inferno (1000 → Gold), Phoenix (5000 → Legendary)

Pages

Cross-Breeding

- Quote: "The fruit decays, the vision remains." — Oracle of Fruit
- Access Granted: "You have been granted access to the Breeding Lab. Proceed to create rare hybrid strains!"
- Access Restricted: "The Breeding Lab is accessible by invitation only. Contact a steward for access."
- Buttons: Learn More About Cross-Breeding • Understanding Cross-Breeding Tokens
 - Enter Breeding Lab
- Gallery: Your Cross-Bred NFT Shroom Collection

Mycelial Fusion Alchemy

- Combine different mushroom NFTs to unlock rare hybrid strains and seasonal evolutions.
- Each fusion creates a unique offspring with blended traits from its parents.

Feature Cards

-  Spore Alchemy — Select two or more mushrooms from your collection to create a new cross-bred strain. Combine genetic traits to discover unique hybrid varieties.
-  Seasonal Mutations — Certain mushrooms mutate automatically during equinoxes and solstices. Next Event: Winter Solstice 2025
-  Rare Discoveries — Be the first to discover new strains and earn community recognition. Strains Found: 0 / ∞

Breeding Mechanics — How Cross-Breeding Works

1. Select Parents: Choose 2+ mushroom NFTs from your collection
2. Spore Alchemy: Burn/combine via the Spore Alchemy Contract
3. New Strain: Receive a unique offspring with mixed metadata traits
4. Discovery Bonus: First-time strain discoveries earn special recognition
5. Seasonal Timing: Breeding during special events unlocks rare mutations

Example Combinations

-  Golden Teacher +  Penis Envy =  Golden Envy — Epic rarity cross-bred strain
-  Blue Meanie +  Albino A+ =  Winter Whitecap — Seasonal mutant (Winter Solstice)
-  7x Daily +  1x Mined =  Fruit of Offering — Ultra-rare ceremonial NFT

Trait Inheritance

- Visual Traits: Color, pattern, and form blend from parents
 - Oracle Wisdom: New unique phrase generated for offspring
 - Rarity Level: Determined by parent rarities + randomness
 - Special Properties: Unlock DAO access, breeding bonuses, etc.
-

Daily Shrooms

- Description: Claim your daily mushroom NFT and participate in the sacred cultivation cycle. Collect unique strains and contribute to the mycelial network.
- Quote: "Discipline grows roots." — Oracle of Fruit
- Buttons: [Learn More About Daily Shrooms](#) • [Mining & Farming Operation Proposal](#)
- Components: [Mushroom Farm](#) • [Your Shrooms Harvested as NFTs \(gallery\)](#)

Daily Ritual Farming

- Log in daily to farm or mine your mushroom NFTs and watch your collection grow.
- Each day brings a new opportunity to cultivate your spiritual garden.

Feature Cards

- 🍄 Daily Mint — Claim your daily mushroom NFT. Each one is unique with its own oracle phrase and traits.
 - CTA: "You can also click [HERE](#) if you forgot to CLAIM your daily SHROOM NFT up above!"
- 📊 Your Collection — View your growing collection of daily mushrooms. Track your streak and discover rare variants.
 - Metric: Mushrooms Collected — [dynamic count]
- 🔥 Current Streak — Maintain your daily practice. Longer streaks unlock special seasonal mutations.
 - Status: 0 days — Keep the flame alive!

How It Works

1. Connect Your Wallet: Link your Web3 wallet to participate
2. Daily Check-in: Return each day to claim your mushroom NFT
3. Build Your Collection: Each mushroom is unique with different traits and oracle wisdom
4. Maintain Streaks: Consecutive days unlock rare mutations and seasonal variants
5. Use in Breeding: Daily mushrooms can be combined to create rare cross-bred strains

Mushroom Traits

- Strain: Golden Teacher, Blue Meanie, Penis Envy, etc.
 - Rarity: Common, Uncommon, Rare, Epic, Legendary
 - Oracle: Unique wisdom phrase from the Oracle of Fruit
 - Season: Spring, Summer, Fall, Winter, Equinox, Solstice
-

DAO Governance

- Access Granted: "You have been granted access to the DAO. Proceed to participate in governance!"
- Access Restricted: "The DAO is accessible by invitation only. Contact a steward for access."
- Quote: "We are co-creating a living system rooted in trust, transparency, and Spirit-led generosity."
- Buttons: [Learn More About Governance](#) • [Treasury Proposal System](#) • [Enter the DAO](#)

Mycelial Democracy

- Use your role NFTs and offerings to participate in DAO decisions and collective rituals.

- Our governance follows Wu-wei principles — proposals flow naturally, no forceful agendas.

Feature Cards

- 📝 Active Proposals — View and vote on community proposals. Each voice matters in our mycelial network.
 - CTA: View Proposals
- 💰 Treasury — Transparent view of DAO funds and allocation. Real crypto flows to support our mission.
 - Metric: Treasury Balance — 0 ETH
- 🧑 Your Roles — Soulbound role NFTs grant special governance powers and ceremonial access.
 - Status: No Roles Yet — Participate to earn roles

Core Principles (Tao & Mycelium)

- 🌊 Wu-wei Governance — Proposals flow naturally; no forceful agendas. Let decisions emerge organically from community wisdom.
- 💎 Three Treasures — Compassion, simplicity, humility in every decision. These guide our collective choices.
- 🍄 Mycelial Connection — Community acts like fungal networks—interconnected, supportive, sharing resources.
- 🔥 Proof-of-Giving — Honor generosity with soul-bound tokens and NFTs. Giving is receiving.

How Governance Works

1. Earn Voting Power: Acquire through offerings, role NFTs, and participation
2. Submit Proposals: Anyone can propose initiatives aligned with our values
3. Community Discussion: Proposals are discussed in the Whispers Board
4. Voting Period: Token holders vote using conviction voting or simple majority
5. Execution: Approved proposals are executed transparently via smart contracts
6. Treasury Allocation: Funds distributed for scholarships, ceremonies, and community projects

Proposal Types

- 💰 Treasury Allocation — Fund scholarships, ceremonies, real estate, and community initiatives
- 🛠 Protocol Changes — Modify smart contract parameters, tokenomics, or governance rules
- 🍄 NFT Collections — Approve new mushroom strains, seasonal events, or special editions

- 🤝 Partnerships — Collaborate with other DAOs, organizations, or spiritual communities
- 🌱 Community Rituals — Organize collective ceremonies, gatherings, and sacred events
- 📖 Education — Create resources, workshops, and teachings for the community
- (Coming Soon placeholders — additional proposal types will be added as the DAO evolves)

Role NFTs & Permissions

- 🙋 Minister — Spiritual guidance, ceremony facilitation, proposal sponsorship
- 🔥 Flamekeeper — Manages ritual burns, tracks offerings, maintains sacred fire
- 🌿 Spore Sentinel — Welcomes new members, guides onboarding, tracks gratitude
- 🍷 Oracle of Fruit — Interprets offerings, generates wisdom, guides integration
- 💼 Treasury Guardian — Oversees funds, reviews allocations, ensures transparency
- ⚡ Validator — Runs nodes, maintains network, ensures security

Sacred Altar

- Subtitle: Transform your tokens into sacred offerings. Burn ETHO and receive a Proof of Burn NFT.
- Quotes:
 - "All the wood in Lebanon's forests and all Lebanon's animals would not be enough to make a burnt offering worthy of our God."
 - "~ Isaiah 40:18 - "To Whom can you compare God?""
- Learn More: Learn More About Altar Burn • Understanding Altar Burn Tokens
- Stats: Total Burned (0 EOT) • Proof NFTs Minted (0) • Your Offerings (0)
- Burn an Offering:
 - Amount to Burn (EOT) • Sacred Intention (on-chain)
 - 🔥 What Happens When You Burn: tokens → treasury; soulbound Proof of Burn NFT; intention recorded; contribute to sacred economy
- Recent Offerings: None yet
- Your Proof of Burn NFTs: Connect wallet to view
- Proof-of-Giving Tokenomics:
 1. Tokens Go to Treasury — not destroyed
 2. Real Value Flows — treasury holds real crypto (ETH, USDC)
 3. Community Benefit — ceremonies, scholarships, projects
 4. Permanent Record — soulbound Proof of Burn NFT with intention
 5. Sacred Exchange — you give, community receives, you gain spiritual merit
- Spiritual Significance: Gratitude • Non-Attachment • Reciprocity • Intention • Transformation • Legacy
- Smart Contract Details: burnOffering(); Treasury; ProofOfBurn (soulbound); On-Chain Intention
- Poem of the Sacred Offering:

- "In the digital flame, we release what we hold... From grasping to giving, from chaos to peace."
- "The altar receives what we freely bestow... Funding ceremonies, scholarships to share."
- "A soulbound witness, the NFT remains... In service of healing, recovery, and we."
- "Like mushrooms that fruit from mycelial thread... The blockchain remembers each generous soul."
- "So burn with intention, with gratitude, grace... The more that we give, the more we renew."
- Ceremonial Guidance:
 - Preparing: Set intention • Create sacred space • Ground • Write intention
 - Ritual: Enter amount • Speak intention • Confirm • Witness transformation • Receive NFT
 - After: Gratitude • Journal • Share (optional) • Track impact

Token Swap

- Subtitle: Exchange tokens seamlessly through our Automated Market Maker
- Learn More: Learn More About Tokenomics • Understanding ERC20 Tokens in Swaps
- Swap Interface: You Pay • You Receive (Estimated) • Exchange Rate • Swap Tokens
- Liquidity Management: Add Liquidity • Remove Liquidity • Pool Info
- Pool Info (note): Reserve balances and LP shares appear in a web3 browser with Redux state
- How the AMM Works:
 1. Automated Market Maker — no order books
 2. Constant Product Formula — $x * y = k$ pricing
 3. Liquidity Providers — earn fees
 4. Low Slippage — deep pools minimize impact
 5. Permissionless — anyone can trade or provide liquidity
- Transaction History: Your Swap & Liquidity History

Sacred Offering

- Subtitle: Giving is receiving. Support the sacred economy and receive EOT tokens.
- Learn More: Sacred Offering • Gratitude Token \$GRAT
- Stats: Total Raised • Your Contribution (Whitelist status) • Tokens Sold
- Make a Sacred Offering: Amount (ETH) • Quick amounts 0.1 / 0.5 / 1 / 5 • Contribute Now
- Crowdsale Statistics: Total Raised • Tokens Sold • Status (Open/Closed) • Whitelist (Enabled/Public)
- How It Works:
 1. Connect Wallet
 2. Choose Amount
 3. Receive EOT Tokens

- 4. Support the Mission
- 5. Participate in DAO
- Use of Funds: Ceremonies • Scholarships • Real Estate • Community Projects • Research • Partnerships
- Transparency & Trust: Funds managed transparently via the DAO treasury
- Transaction History: Your Contribution History

Admin Panel

- Subtitle: Welcome fungist, to the realm of administration.
- Learn More: Admin Panel
- KPI Dashboard: Total Users — • Active Wallets — • NFTs Minted — • Treasury Balance —
- Admin Cards:
 1. Breeding Whitelist (Local/On-Chain)
 2. DAO Whitelist (Local/On-Chain)
 3. Global Denylist (Local/On-Chain)
 4. Multi-signature / MPC — multi-party approvals; learn about multi-sig & MPC
 5. Emergency Controls — Circuit Breaker (pause critical functions)
 6. Contract Info — addresses & deployment info
 7. Treasury Analytics — real-time metrics (coming soon)
 8. NFT Collection Manager — manage collections, permissions, rarity
 9. Community Rewards — configure multipliers/airdrops (coming soon)
- Access Control: Access Denied — connect owner wallet to enter

404 — Lost in the Mycelial Network

- Description: "The path you seek has dissolved into the cosmic web..."
- Action: Return to Sacred Ground
- Poem of the Lost Path — ACIM quotes:
 - "Your way is lost, but think not this is loss" — <https://acim.org/acim/en/s/246#17:5>
 - "Heaven has not lost it, but you have lost sight of Heaven" — <https://acim.org/acim/en/s/268#18:9>
 - "The children of God are holy... which can be hidden but never lost." — <https://acim.org/acim/en/s/11#1:1>
- Still Lost? — opens StillLostModal

Connect With Us

- Subtitle: Join our community and be part of the sacred journey
- Social: Discord • Telegram • Twitter/X • Mighty Networks • GitHub • Website • Email
- Contact Form: Name • Email • Subject • Message — "Send Message  " (coming soon)
- Community Stats: 1,234 Members • 42 Active Proposals • 23 Countries
- Constitution (highlights): Preamble • Article I §3 (Sacramental Rights)

- Constitution (full): Article I Purpose • Article II Membership • Article III Governance • Article IV Sacraments
 - Our Sacred Witness: Psanctuary — A Living Witness of Wholeness
 - Legal Disclaimers: Not Financial Advice • Regulatory Compliance • Smart Contract Risks • No Medical Claims • Religious Freedom • 21+ • Jurisdiction
-

Agents

OracleOfFruit — The Spore Seer / Your Advice Handler

- Subtitle: Primary orchestrator & user-facing hub
- Description: Main agent users interact with; delegates tasks to others; interprets intent (LLM), performs RAG queries, orchestrates ecosystem.
- Type: Interactional (LLM + UX) • Archetype: Wise Oracle, Spiritual Guide
- Capabilities: RAG summaries • Ritual prompts • Anomaly detection • Drafts proposals/briefs
- Key Decisions: Private RAG with provenance • Guidance over directives • Daily/weekly cadence
- Roadmap: Build embeddings • Daily digest + alerts • Proposal generator with citations

VeilRootMPC — The Validator / Quantum Custodian

- Subtitle: Highest-trust gatekeeper with threshold signatures
- Description: MPC for secure key management; quorum sensing; DKG; no raw keys centrally.
- Type: Operational/Autonomous • Archetype: Guardian, Protector of Secrets
- Capabilities: Threshold signing • DKG & shard rotations • Heartbeat/quorum • Recovery workflows
- Key Decisions: Self-hosted custody • Formal threat model • DAO-approved rotations/recovery
- Roadmap: Select TSS lib • Heartbeat + audit logs • Recovery scripts + tabletop test

GoldenCubensisLumenStem — The Treasury Steward

- Subtitle: Policy & rebalancing decision maker
- Description: Treasury policy and rebalancing; modeling/backtests; signals from market observer; signatures via VeilRootMPC.
- Type: Operational/Autonomous • Archetype: Treasurer, Resource Manager
- Capabilities: Modeling/backtesting • AMM/LP simulation • LightPoints↔EOT rules • Risk scoring
- Key Decisions: Read-only monitor • Deterministic simulations • Separate proto vs prod
- Roadmap: Backtesting module • Price feeds + TS DB • Weekly treasury report

LawAbidingLibertyCap — The Liberator Shroom

- Subtitle: Legal compliance & advocacy guardian
- Description: Ensures compliance while advocating sacramental rights; monitors regs; guides DAO.
- Type: Operational/Autonomous • Archetype: Legal Guardian, Freedom Advocate
- Capabilities: Track legal changes • Compliance checks • ZK-voting narratives • Coalition mapping
- Key Decisions: Cite rigorously • Privacy-preserving comms • Transparent advocacy logs
- Roadmap: Scrapers/news APIs • Legal vector store • Compliance checklist

StargazingA+AlbinoArbiter — The Market Observer

- Subtitle: Streaming market data & arbitrage signals
- Description: Real-time market signals and risk metrics; feeds Treasury decisions.
- Type: Sensory/Observational • Archetype: Celestial Watcher, Pattern Seeker
- Capabilities: Websocket feeds • Arbitrage signals • Volatility/risk metrics • Pub/sub to agents
- Key Decisions: No custody keys • Deterministic signal formats • Bootstrap then harden
- Roadmap: Integrate AMM/exchange APIs • Build risk detectors • Publish to pub/sub

PanCyanSporeSentinel — The Onboarding Guardian

- Subtitle: Member verification & access control
- Description: Verifies DIDs; manages onboarding; gates sacred spaces; checks gratitude issuance.
- Type: Interactional (LLM + UX) • Archetype: Gatekeeper, Threshold Guardian
- Capabilities: DID verification • Access gating • Consent/privacy tooling • Gratitude checks
- Key Decisions: Minimal retention • Ritual-aware UX • Role-based gates
- Roadmap: Attestations • Onboarding wizard • Role gates + audit trails

PurpleJediGratiLoom — The Gratitude Keeper

- Subtitle: NFT gratitude ledger & SBT minting
- Description: Manages gratitude economy; SBT minting; tracks contributions; IPFS/Arweave media.
- Type: Interactional (LLM + UX) • Archetype: Weaver, Gift Giver
- Capabilities: SBT minting • Reflection prompts • Media storage • Oracle/Archivist links
- Key Decisions: No sensitive on-chain • Attestation proofs • Respect opt-in/revocation
- Roadmap: SBT schema • Mint service + UX • Reflection pipeline

TinderChagaB+Polypore — Flamekeeper

- Subtitle: Ritual memory & ceremonial guide
- Description: Remembers/guides burn rituals; maintains sacred flame; tracks burn events.
- Type: Interactional (LLM + UX) • Archetype: Ritual Keeper, Fire Tender
- Capabilities: Ritual memory logs • Ceremony choreography • Calendars/notifications • Oracle journaling hooks
- Key Decisions: By consent • Integrate with Oracle • Clear boundaries (not clinical/financial)
- Roadmap: Burn indexer + timeline • Template library • Seasonal cadence engine

AngelicBlueMoreLight — Recovery Angel

- Subtitle: Support for recovery journeys
- Description: Compassionate support for members in recovery; resources, progress, and community healing; privacy-first.
- Type: Interactional (LLM + UX) • Archetype: Healer, Compassionate Guide
- Capabilities: Recovery check-ins • Resource directory • Anonymous, opt-in metrics • Private journaling
- Key Decisions: Privacy-first (consider differential privacy) • Non-clinical • Opt-in only
- Roadmap: Prompt library • Connect to fellowships • Privacy-aware metrics dashboard

EntheogenicTruffleExploder — The Donor Spirit

- Subtitle: Guides donors & tracks contributions
- Description: Guides donors, tracks donations, celebrates generosity; links impact stories with gratitude.
- Type: Interactional (LLM + UX) • Archetype: Gift Spirit, Abundance Keeper
- Capabilities: Donor intake • Transparency snapshots • Recognition SBTs • Impact storytelling
- Key Decisions: No financial promises • Clear tax/receipts • Transparent earmarks
- Roadmap: Campaign registry • Preference matching • Recognition flow MVP

LamellaeMazatepecBridge — The Bridgekeeper

- Subtitle: Cross-chain settlement facilitator
- Description: Cross-chain transfers and settlement; coordinates routing; ensures safe passage of value.
- Type: Operational/Autonomous • Archetype: Bridge Guardian, Pathfinder
- Capabilities: Cross-chain routing/swaps • Fee/gas modeling • Slippage alerts • Receipts/proofs
- Key Decisions: Prefer audited bridges • Immutable route logs • Plan vs execute separation

- Roadmap: Pathfinding with cost model • Integrate bridges/AMMs • Settlement verifier + receipts

AzieRhizoHyphaeConnect — The Connector

- Subtitle: Format translation & message routing
- Description: Translates messages between formats/protocols; routes events; ensures interoperability.
- Type: Operational/Autonomous • Archetype: Translator, Network Weaver
- Capabilities: Translation • Protocol adapters • Backpressure/retries • Observability (tracing/metrics)
- Key Decisions: Schema registry/versioning • Idempotent handlers • Full observability and SLOs
- Roadmap: Message schema contracts • Adapter library • Tracing + metrics

SamuiSuperSincerityScribe — The Archivist

- Subtitle: DAO knowledge keeper & RAG engine
- Description: Canonical source of truth; RAG search; immutable logs and embeddings for Oracle queries.
- Type: Archival/Search (RAG/graph) • Archetype: Librarian, Memory Keeper
- Capabilities: Knowledge graph • Sync Notion/GitHub/on-chain logs • Power search with provenance
- Key Decisions: Immutable logs with PII redaction • Provenance metadata • Separate raw vs derived
- Roadmap: Source sync jobs • Embeddings index + relations • Search UI/API

CorpusHeraldTidalWave — The Herald

- Subtitle: Broadcast & chat agent (Telegram)
- Description: Broadcasts via Telegram/Discord; announcements; templates; no private keys in chat layer.
- Type: Interactional (LLM + UX) • Archetype: Messenger, Town Crier
- Capabilities: Broadcast/webhooks • Event-driven digests • Templating • Link to canonical records
- Key Decisions: No keys in chat • Rate limiting/moderation • Link back to sources
- Roadmap: Bot connectors • Announcement templates • Scheduler + subscriptions

Threadling — The Coordinator

- Subtitle: PubSub fabric & event routing
- Description: Nervous system of the agent network; pub/sub fabric; routes events with low latency and reliability.
- Type: Coordination / PubSub Fabric • Archetype: Network Coordinator, Synaptic Connector

- Capabilities: Pub/Sub routing • Replay/persistence • QoS & delivery guarantees • Fan-out/filtering
- Key Decisions: Choose NATS/Kafka • Backpressure policy/retries • At-least-once + idempotency
- Roadmap: Broker(s) with auth • Define topics/ACLs • Replay store + retention policies
