

Website for Gratitude Token Project Documentation

Visit the documentation site here:  [Gratitude Token Project Docs](#)

- This website was initialized using [Docusaurus](#), a modern static website generator.

Detailed Setup Guide

Please refer to our [Docusaurus Setup Guide](#) for detailed instructions on setting up and maintaining this documentation site.

General Installation provided by Docusaurus using yarn:

```
yarn
```

Local Development

```
yarn start
```

This command starts a local development server and opens up a browser window. Most changes are reflected live without having to restart the server.

Build

```
yarn build
```

This command generates static content into the `build` directory and can be served using any static contents hosting service.

Deployment

Using SSH:

```
USE_SSH=true yarn deploy
```

Not using SSH:

```
GIT_USER=<Your GitHub username> yarn deploy
```

If you are using GitHub pages for hosting, this command is a convenient way to build the website and push to the gh-pages branch.

To publish to GitPages:

1. npm run build
2. USE_SSH=true npm run deploy
 - Other option: GIT_USER=drasticstatic npm run deploy
